For Immediate Release

13 November 2007

**Clean Air Power Limited**  
**("Clean Air Power" or "the Company")**

**Contract Win**

Clean Air Power Limited (AIM: CAP), the developer of Dual-Fuel™ combustion technology that enables heavy-duty diesel engines to run on a combination of both diesel and natural gas, is pleased to announce that following the successful 6 month trial of 2 Genesis systems by Robert Wiseman Dairies (RWD), Scotland's largest fresh milk provider, Robert Wiseman Dairies have placed an order for a further 20 systems.

Robert Wiseman Dairies began trialing Clean Air Power's Genesis systems on 2 DAF CF85 trucks six months ago at the Company's East Kilbride dairy. The trial gave excellent results providing Robert Wiseman Dairies with a 25% fuel cost saving as well as a carbon saving of 18 tonnes per annum.

As a consequence of the successful trial, Robert Wiseman Dairies has ordered a further 20 Genesis systems which will all be used on DAF CF85 trucks based in Bellshill, Glasgow and Droitwich, West Midlands. The total order is worth £0.3 million and delivery of the systems will start in December 2007 with all 20 units to be delivered by the end of March 2008.

John Pettitt, CEO of Clean Air Power, commented "We view this order as a very significant step forward for Clean Air Power as this is the first major recognition of our Genesis System. Robert Wiseman Dairies is a major company with over 1,500 trucks in their fleet and we are delighted that they are so satisfied with the first two systems. The excellent results of the trial really emphasise the fuel cost and carbon emission savings that the Genesis System offers to customers."

As previously announced, the Company continues to investigate funding options.

## Notes to Editors:

### About Clean Air Power

Clean Air Power is the developer and provider of Dual-Fuel™ combustion technology for heavy duty diesel engines. Dual-Fuel™ engines substantially cut fuel costs and carbon emissions without sacrificing the original engine's characteristic efficiency or reliability. Clean Air Power is well positioned to assist corporations and governments to deliver on their environmental commitments while at the same time reducing transport operators overheads.

Further information on Clean Air Power is available at [www.cleanairpower.com](http://www.cleanairpower.com)

### About Genesis

Clean Air Power's patented Dual-Fuel™ technology allows a heavy duty diesel truck engine to run on a combination of both diesel and natural gas, thereby generating significant fuel cost savings for the operator whilst considerably reducing emissions and CO2.

'Genesis' was designed to be generic and is ultimately adaptable to fit any Euro III engine thereby rendering a much wider market accessible to the Company. Clean Air Power has developed the technology to operate on both DAF CF85 and Mercedes Axor Euro III heavy duty trucks.
