

7 April 2008

Jon Berry appointed Group Operations Manager

Jon Berry, formerly UK Operations Manager for Clean Air Power, has been appointed as Group Operations Manager. In his new role, Jon will be responsible for Clean Air Power's global product quality and support, component production in the USA and vehicle construction in the UK and Australia.

Jon Berry joined Clean Air Power in 2003, having been employed in senior roles in the transport manufacturing industry. Jon has gained extensive manufacturing and project management experience working for international truck, aerospace and rail rolling stock manufacturers with seven years at Foden Trucks (a division of PACCAR), three years at Pilkington Aerospace and three years at Alstom Transport.

Jon, who lives in Cheshire and is married with a young daughter, has a Degree in Electrical & Electronic Engineering and is a member of The Institution of Engineering and Technology.

Clean Air Power offers Dual-Fuel™ technology which combines diesel and natural gas to provide customers with diesel engine performance, operating fuel cost savings and low carbon emissions. Clean Air Power's Dual-Fuel™ technology is available both as an original equipment integrated product as well as a retro-fit solution for truck manufacturers and users and can be found on more than 1,600 trucks used by 50 companies worldwide.
